

How to view MHT file(Active Report) on Ipad

Shane

2013-10

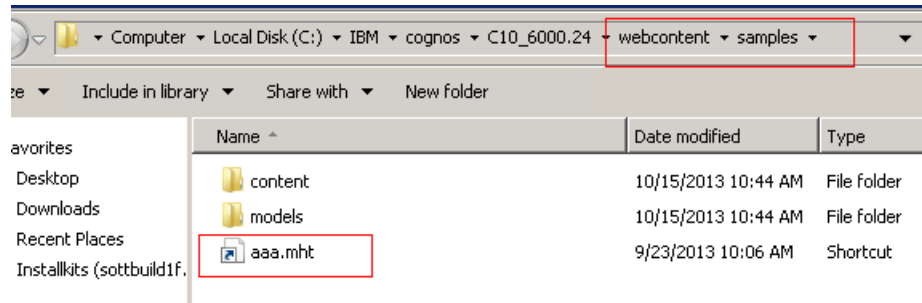

1. Have Apache server be able to handle MHT file.
 - Open mime.types file under Apache installation folder(under /conf folder) and add "mht" behind "message/rfc822"

```
C:\Program Files (x86)\Apache Software Foundation\Apache2.2\conf\mime.types - Notepad
File Edit Search View Encoding Language Settings Macro Run Plugins Window ?
prompt.xml FTP_test.bat AUTO_CFG_INSTALL.bat mime.types
1282 # message/delivery-status
1283 # message/disposition-notification
1284 # message/example
1285 # message/external-body
1286 # message/feedback-report
1287 # message/global
1288 # message/global-delivery-status
1289 # message/global-disposition-notification
1290 # message/global-headers
1291 # message/http
1292 # message/imdn+xml
1293 # message/news
1294 # message/partial
1295 message/rfc822 eml mime mht
1296 # message/s-http
1297 # message/sip
1298 # message/sipfrag
1299 # message/tracking-status
1300 # message/vnd.si.simp
1301 # model/example
1302 model/iges igs iges
1303 model/mesh msh mesh silo
1304 model/vnd.collada+xml dae
1305 model/vnd.dwf dwf
1306 # model/vnd.flatland.3dml
1307 model/vnd.gdl gdl
1308 # model/vnd.gs-gdl
1309 # model/vnd.gs.gdl
1310 model/vnd.gtw gtw
```

- Restart Apache service to load new file.

2. Put the MHT file to <C10_location>/webcontent/samples(for example)

3. Open BI server web portal adding the relative path (adding /samples/*.mht)where you put the mht file in safaris
