

# How to TM1 Perspective to embed TM1 into Office 2007

---

**Shane**

2014-2

## Software Environment preparation

-TM1 : 10.2.0

-Office: 2007 Enterprise

-OS: Win Server 2008

## Installations:

Step1: Install TM1 using issetup.exe wizard, choose your installation path and Next to finish(Please ensure all component are checked on)

Step2: Install Office 2007 Enterprise.

Step3: Open TM1 Perspective, an Excel window shows, wait a while, [an error](#) like this will show:

### Error 1:

Microsoft Forms

Could not load an object because it is not available on this machine.

Click ok.

### Error 2:

Microsoft Visual Basic for Applications

Compile error in hidden module: MenuFuncs

Step4: Download and install windows security updates for office 2007 from <http://technet.microsoft.com/en-us/security/bulletin/ms12-aug>

Step5: Restart PC, and then start TM1 Perspective, you would see another error:

## Error:

Automation Error

Unspecified Error

Step 6: you need to follow [a few steps](#) or use to bat to repair this problem:

create a batch file with following text:

```
reg delete hkcr\typelib\{831FDD16-0C5C-11D2-A9FC-0000F8754DA1}\2.0 /f
```

```
if exist %systemroot%\SysWOW64\cscript.exe goto 64
```

```
%systemroot%\system32\regsvr32 /u mscomctl.ocx
```

```
%systemroot%\system32\regsvr32 mscomctl.ocx
```

```
exit
```

```
:64
```

```
%systemroot%\sysWOW64\regsvr32 /u mscomctl.ocx
```

```
%systemroot%\sysWOW64\regsvr32 mscomctl.ocx
```

```
exit
```

Save and run this bat. Then open perspective, excel will open successfully, and TM1 will embedded in as an Option in Menu bar.
